Answer: INVISIBLECHAINS

2. What is the first Wi-Fi SSID(Decoded) they connected to on May 30th 2025?

This can be viewed on event viewer>Action>Open Saved Log>Select C:\Windows\System32\winevt\logs\Microsoft-Windows-WLAN-AutoConfig%4Operational.evtx. Then, first event ID 11000 on May 30th shows the answer

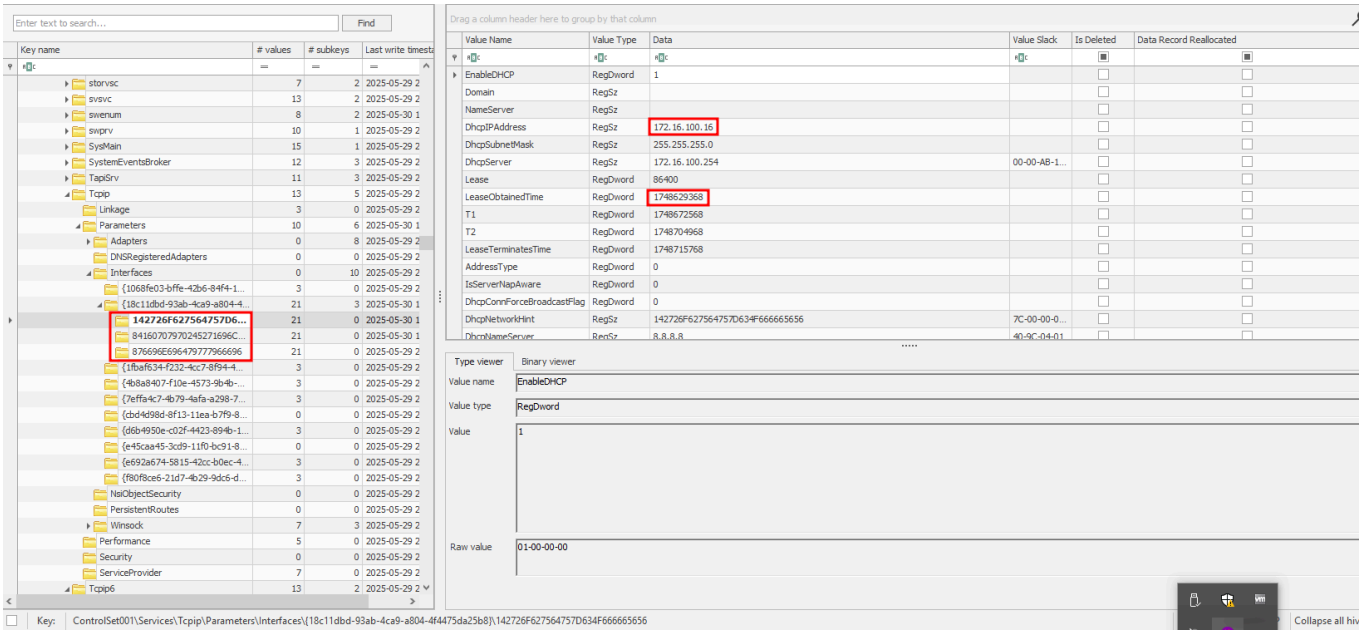

11000 means wireless network association started

Answer: ArboretumCoffee

3. When did the system obtain a lease for the network?

It can be viewed on registry. Download registry explorer(Eric Zimmerman's tools) and launch it. Then, File>Load hive>C:\Windows\System32\config\SYSTEM>NO>Yes(load dirty hive) and navigate to Root\ControlSet001\Services\Tcpip\Parameters\Interfaces{GUID}. Inside there are three keys.

LeaseObtainedTime is stored as an integer. It can be converted to time by this code

```
import datetime
import sys

# Assuming reg_dword_value is the integer retrieved from the registry
reg_dword_value = int(sys.argv[1])

# Convert Unix timestamp to datetime object
date_time_object = datetime.datetime.fromtimestamp(reg_dword_value,
tz=datetime.timezone.utc)

print(f"The REG_DWORD timestamp converts to: {date_time_object}")
```

```
PS C:\Users\net455admin\Downloads> python .\reg_to_date.py 1748629368
The REG_DWORD timestamp converts to: 2025-05-30 18:22:48+00:00
```

Answer: 2025-05-30 18:22:48

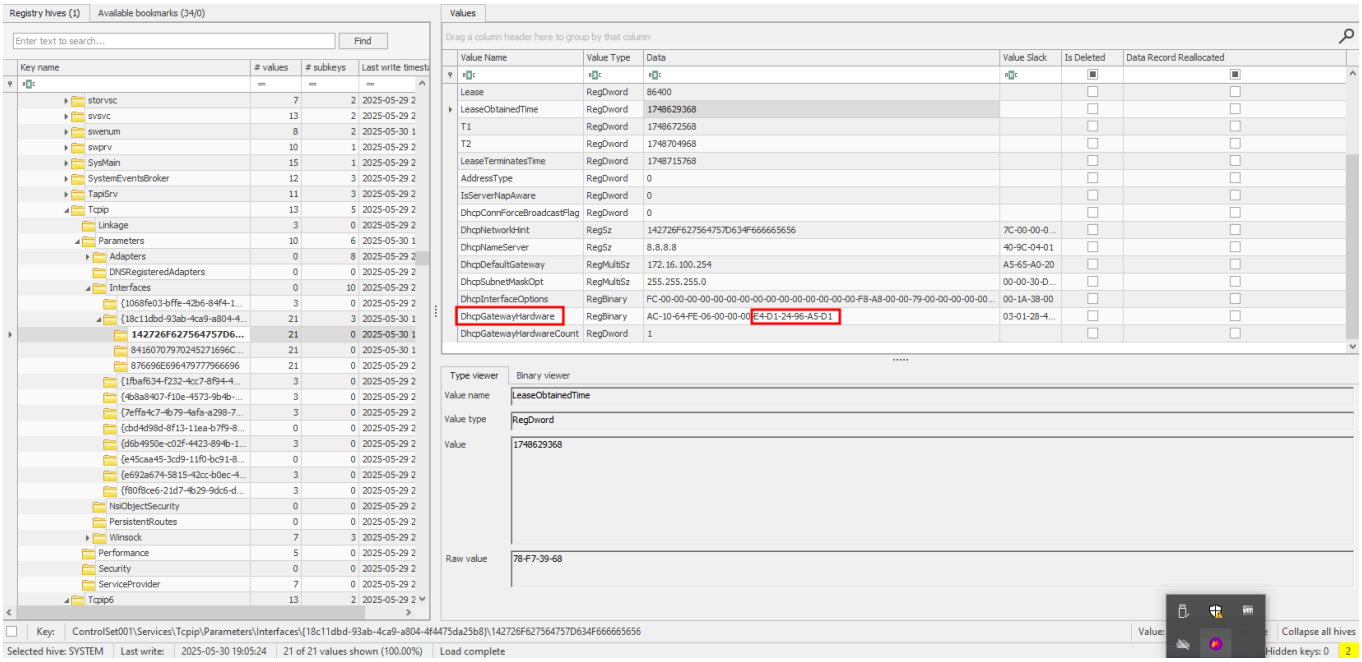

4. What IP address did the device receive when connecting to the café?

It's already in the above screenshot

Answer: 172.16.100.16

5. What was the BSSID (MAC address) of the access point they connected to at the café?

In the same key, scroll down and there is DhcpGatewayHardware

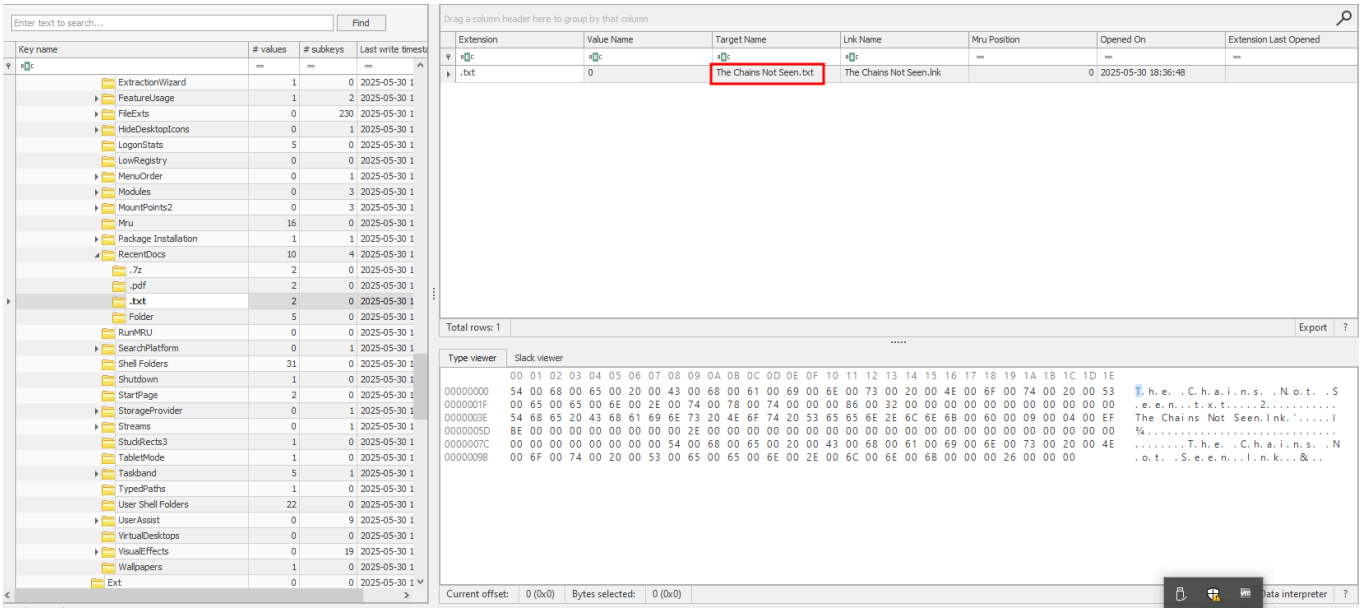

The last 6 bytes is the MAC

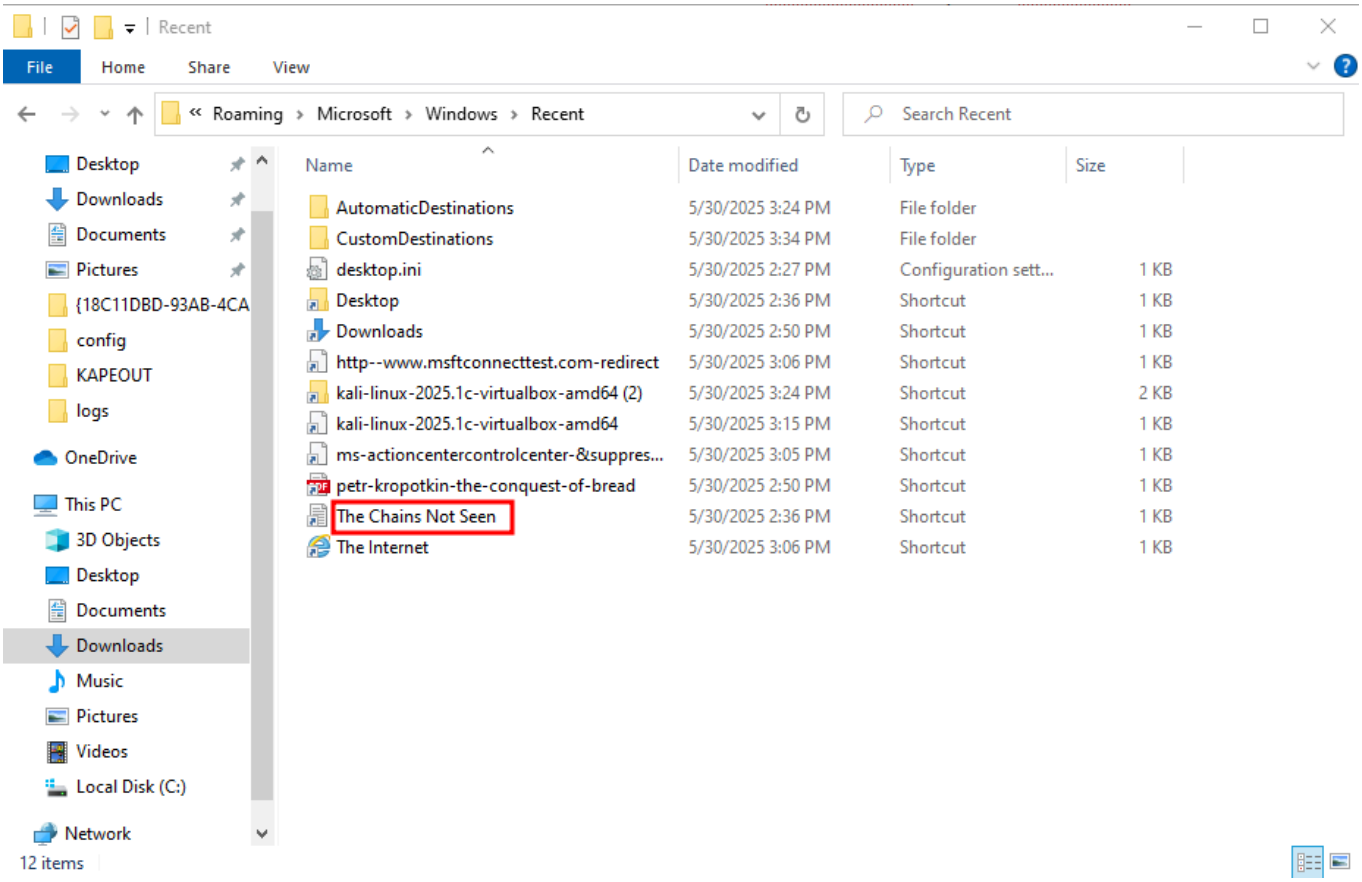

Answer: E4-D1-24-96-A5-D1

6. It looks like they started some sort of manifesto at the café, what is the name of the file they started to write?

In registry explorer, load C:\Users\Ernes\NTUSER.DAT and navigate Root\Software\Microsoft\Windows\CurrentVersion\Explorer\RecentDocs. There's a txt file

Or just go into the C:\Users\Ernes\AppData\Roaming\Microsoft\Windows\Recent

Answer: The Chains Not Seen.txt

7. What is the last sentence of the manifesto?

The file itself is a shortcut and it's linked to OneDrive, which is not here, so I need to find it in $MFT. Download MFTECmd(Same source as Registry Explorer) and run this command

```
\MFTECmd.exe -f '.\WhyFind\KAPEOUT\C\$MFT' --json MFT_OUT
```

```
PS C:\Users\net455admin\Downloads> .\MFTECmd\MFTECmd.exe -f '.\WhyFind\KAPEOUT\C\$MFT' --json MFT_OUT
MFTECmd version 1.3.0.0

Author: Eric Zimmerman (saericzimmerman@gmail.com)
https://github.com/EricZimmerman/MFTECmd

Command line: -f .\WhyFind\KAPEOUT\C\$MFT --json MFT_OUT

Warning: Administrator privileges not found!

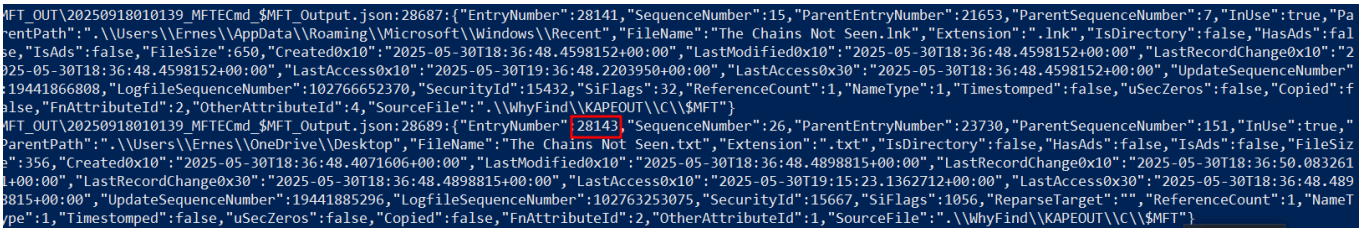

File type: Mft

Processed .\WhyFind\KAPEOUT\C\$MFT in 10.3103 seconds

.\WhyFind\KAPEOUT\C\$MFT: FILE records found: 235,651 (Free records: 605,844) File size: 822MB
Path to MFT_OUT doesn't exist. Creating...
        JSON output will be saved to MFT_OUT\20250918010139_MFTECmd_$MFT_Output.json
```

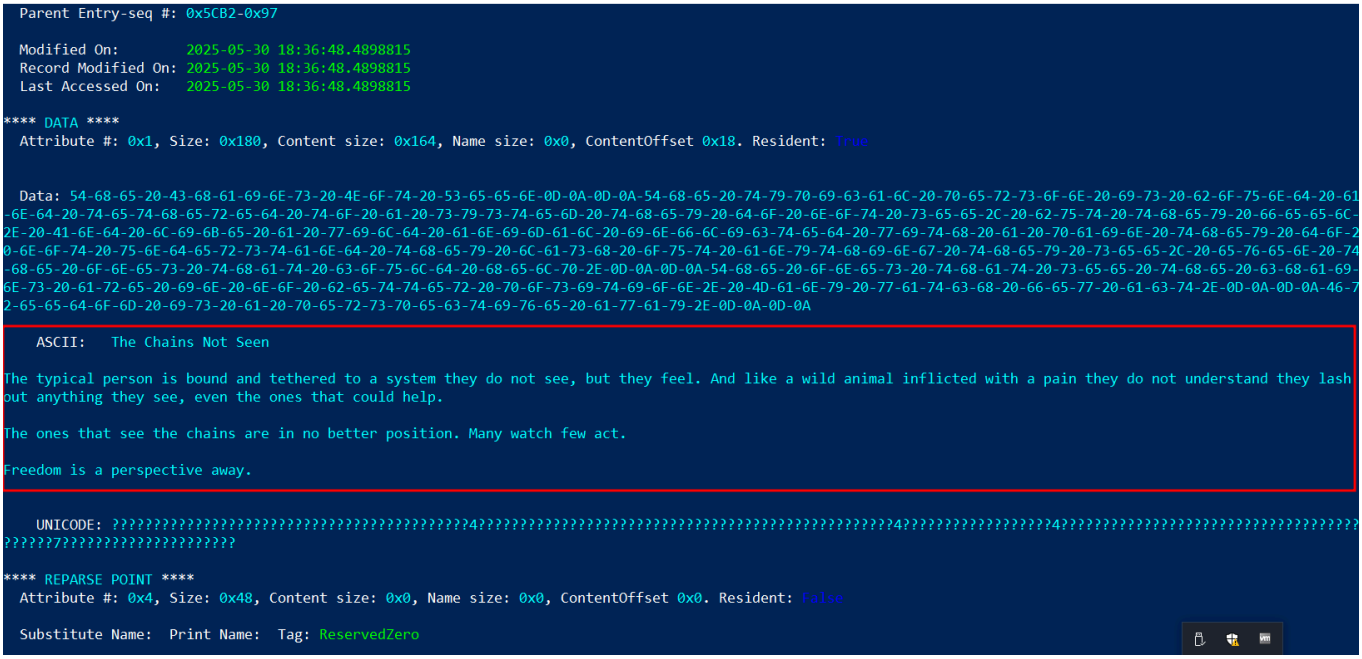

I can check logs that contains the filename

```
Select-String -Path '.\MFT_OUT\20250918010139_MFTECmd_$MFT_Output.json' -Pattern
'The Chains Not Seen'
```

I can use this entry number to get the file content by this command

```
.\MFTECmd\MFTECmd.exe -f '.\WhyFind\KAPEOUT\C\$MFT' --de 28143
```

Answer: Freedom is a perspective away.

8. They started their research by watching a YouTube video of a speech, what is the name of the speech?

9. They continued their research by looking up a book on Wikipedia, what was the title of the book?

There's history database of Edge browser at C\Users\Ernes\AppData\Local\Microsoft\Edge\User Data\Default\History. The urls tables shows visited urls

urls (47 rows) Export

```
SELECT * FROM 'urls' LIMIT 0,30
```

Execute

id	url	title	visit_count	typed_count	last_visit_time	hidden

1 / 1

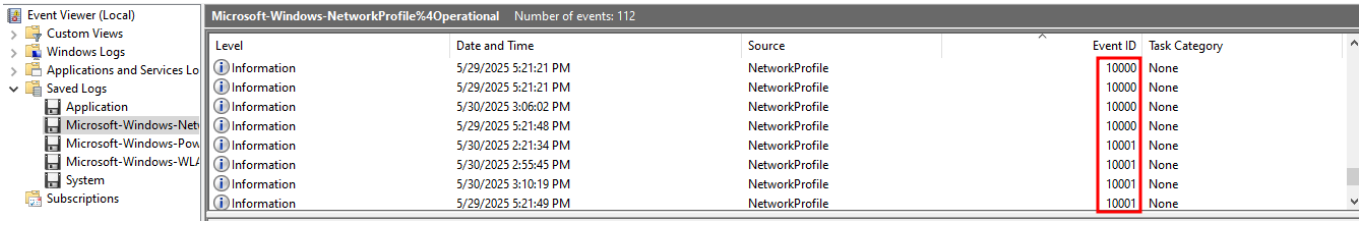

Answer: BraveBrowserSetup.exe

11. When investigating changes to network profiles on a Windows system, which event log would you examine to find entries related to these profile-specific events, using event IDs such as 10000 or 10001?

This is the event log related to network profile

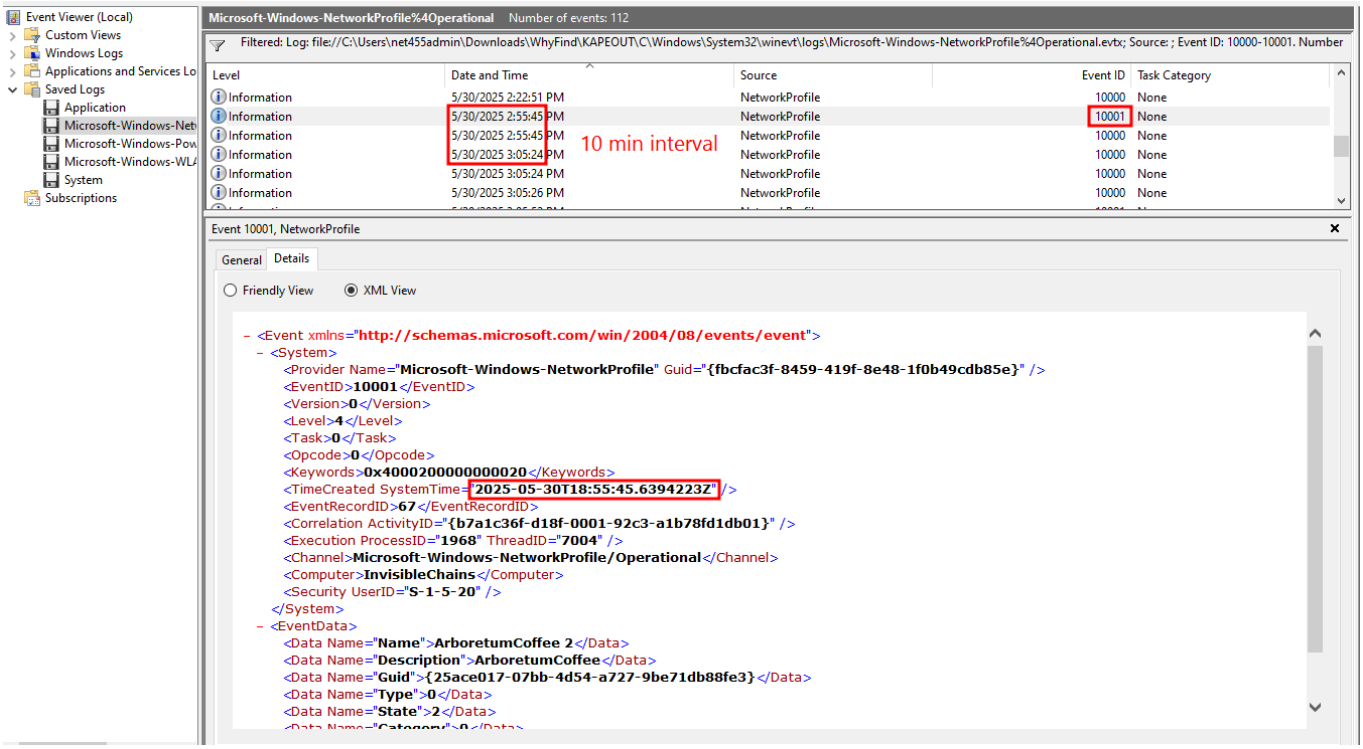

I can see bunch of 10000,10001 as indicated when I see it in event viewer

12. Using the logs from the previous answer, when did they disconnect and leave the first café?

Since 10000 means connected to wireless and 10001 means disconnected, I want to find a log that has some time between 10001 and 10000(So that they disconnect the connection on first cafe and reconnect to the second cafe) on May 30

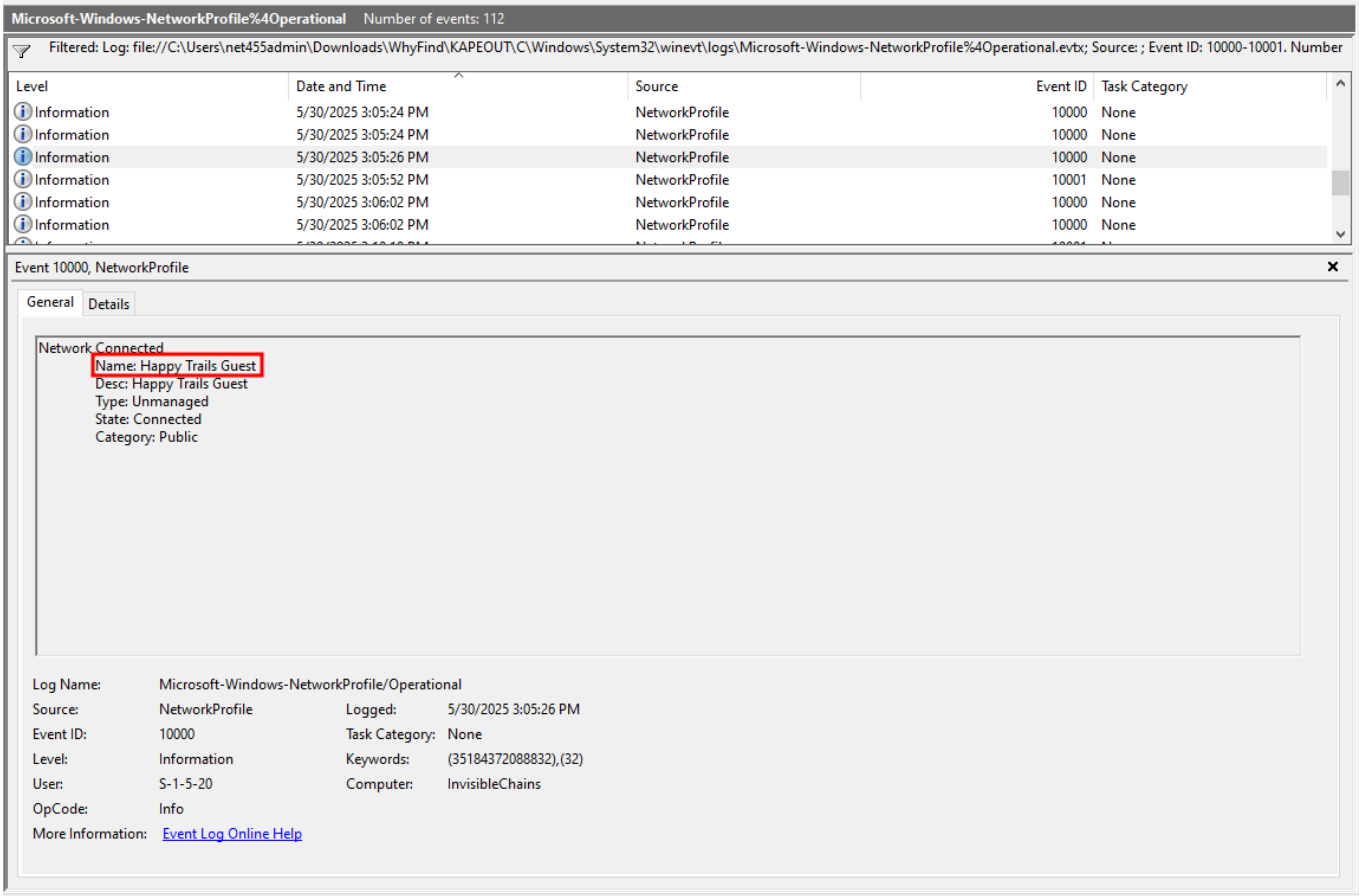

(I filtered only event 10000-10001 here)

Warning: Date and Time shows its local time. For utc time, verify systemtime in xml.

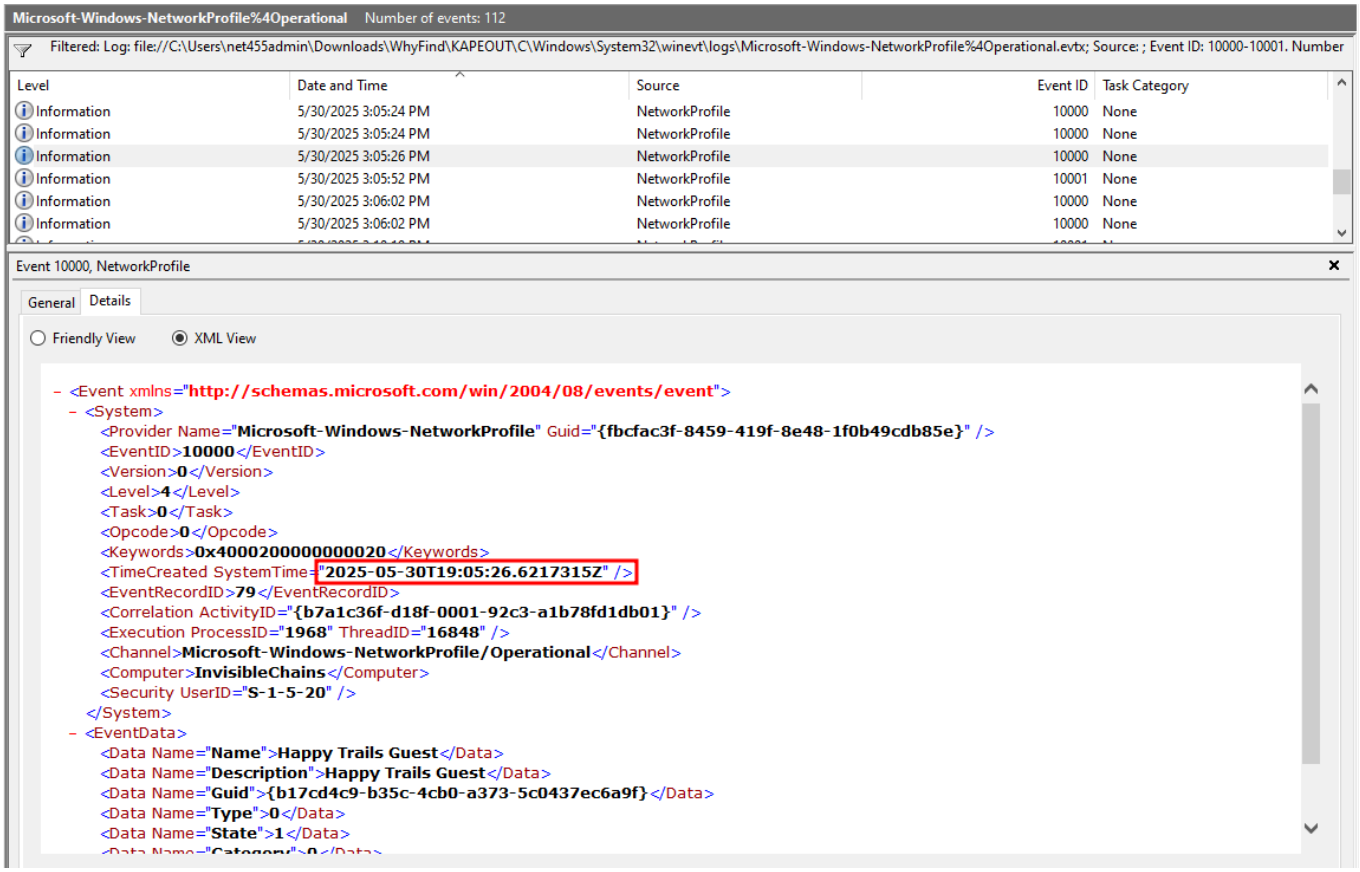

Answer:2025-05-30 18:55:45

13. Using the same logs, when did the user arrive at the second café?

14. What is the SSID(decoded) of the second Wi-Fi they connected to on May 30th 2025?

24sec shows the log, but since 26sec starts to show the network name, the latter should be the answer

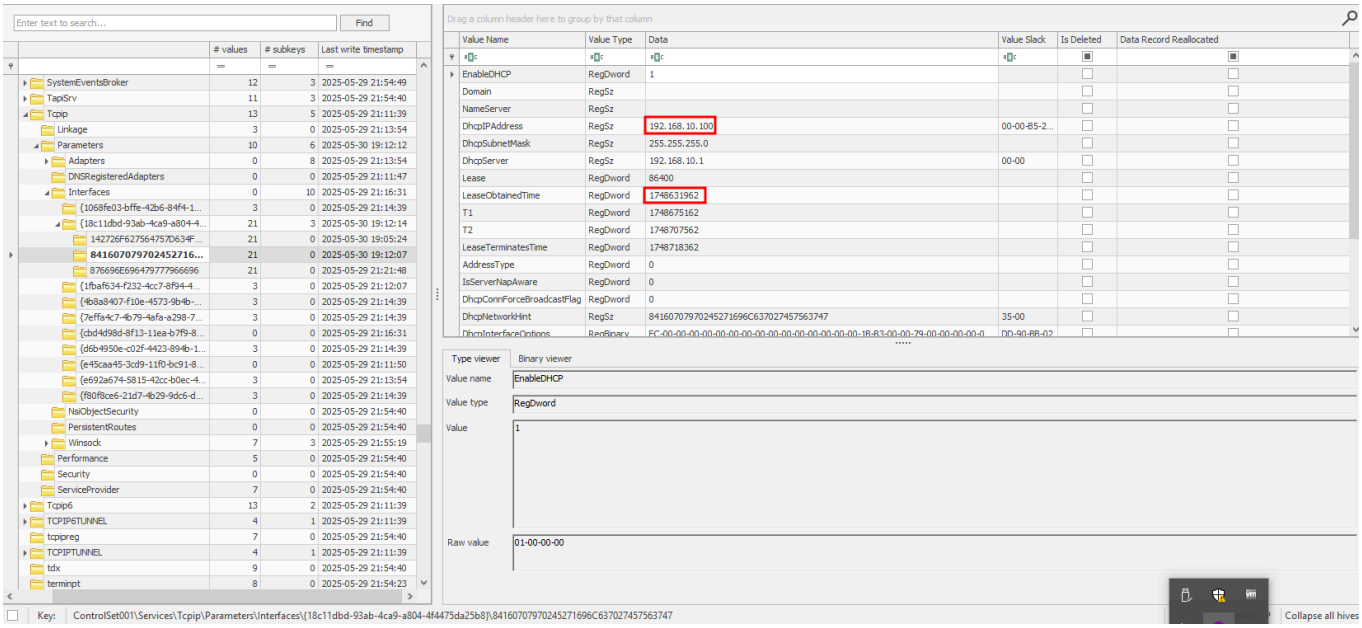

Answer: 2025-05-30 19:05:26

Answer: Happy Trails Guest

15. What IP address did the device receive when connecting to the second café?

16. When did the system obtain a lease for the second network?

See the registry explorer where I already found ip. There are two more ips, but only the second one matches the time for the second cafe

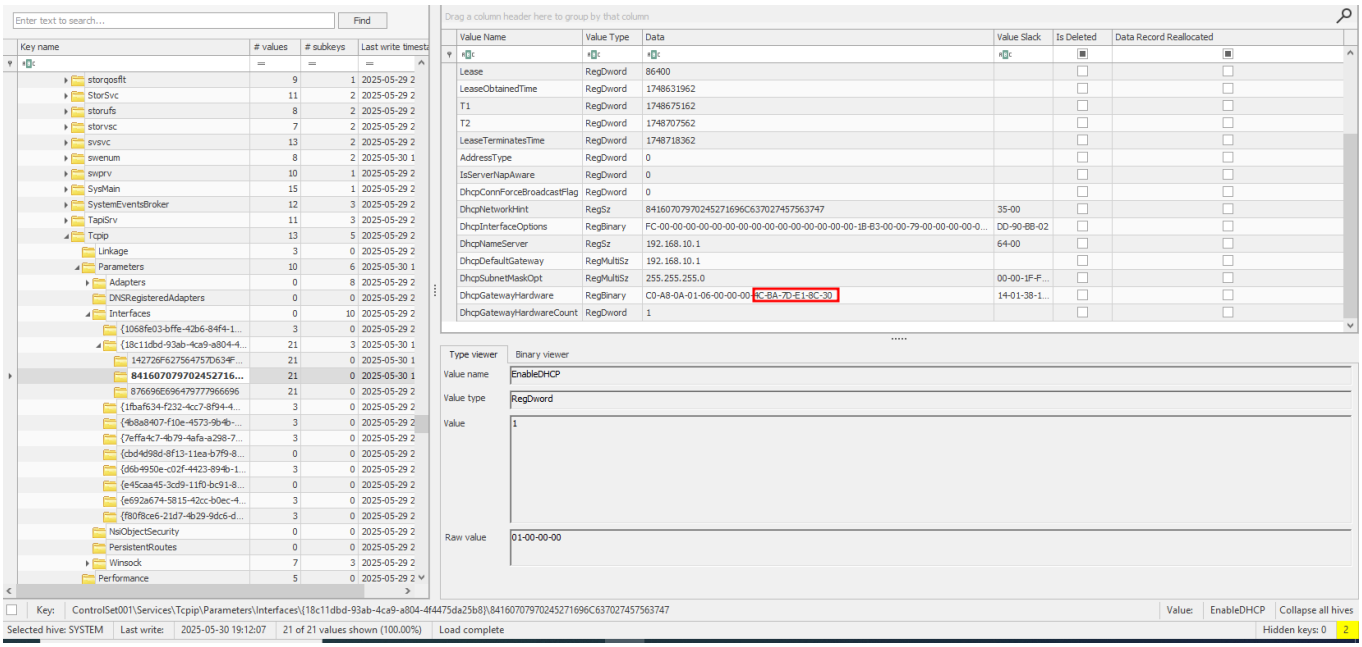

Answer: 192.168.10.100

Run python code for the leaseobtainedtime

```
PS C:\Users\net455admin\Downloads> python .\reg_to_date.py 1748631962
The REG_DWORD timestamp converts to: 2025-05-30 19:06:02+00:00
```

Answer: 2025-05-30 19:06:02

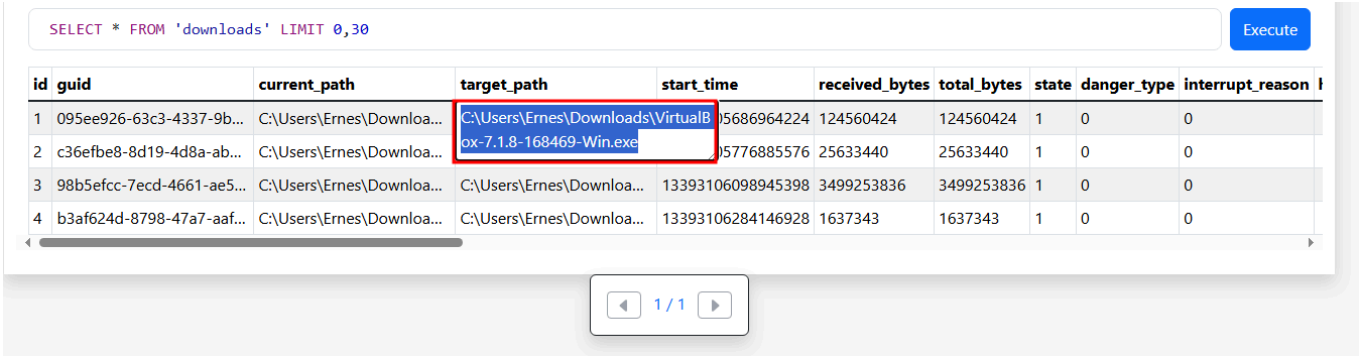

17. What was the BSSID (MAC address) of the access point they connected to at the second café?

Answer: 4C-BA-7D-E1-8C-30

18. What was the first thing the user downloaded at the second café?

Since the user downloaded bravebrowsersetup.exe in the end of Edge history, it seems like the rest of the work is done by brave browser, so let's check history database of brave browser on C\Users\Ernes\AppData\Local\BraveSoftware\Brave-Browser\User Data\Default\History. View the table downloads

Answer: VirtualBox-7.1.8-168469-Win.exe

19. What online forum/social media site did they visit?

Check urls table

Answer: Reddit

20. What was their username on the site?

There's another database file login data in the same folder. Check logins table

Answer: FinanciallyFree3636

21. What was the name of the VM they created?

I can find string "virtualbox vms" in the $MFT output log created by MFTECmd

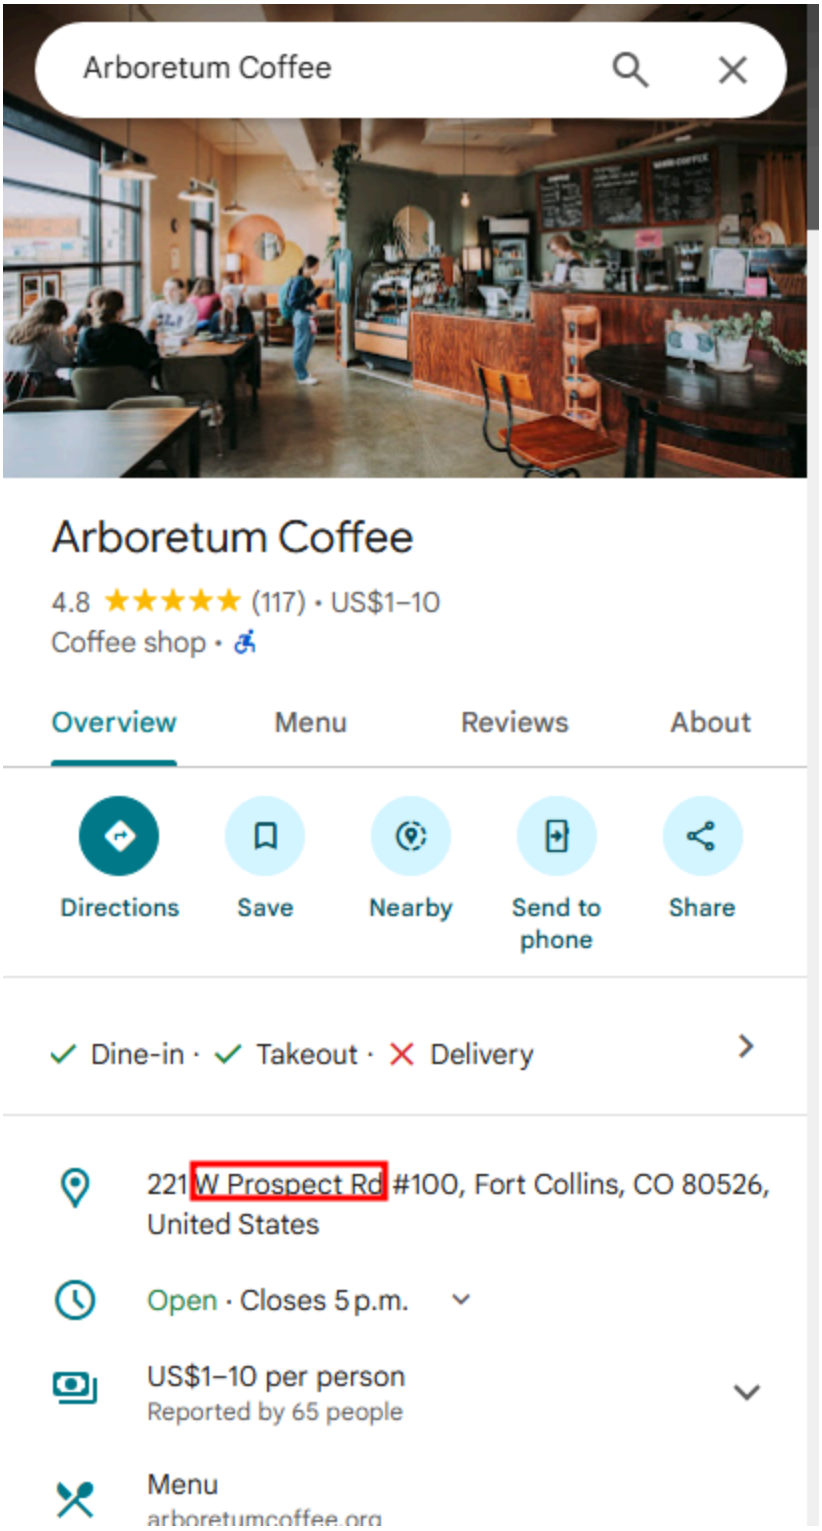

```
Select-String -Path '.\MFT_OUT\20250918010139_MFTECmd_$MFT_Output.json' -Pattern
'virtualbox VMs'
```

Answer: LastHope

22. What street was the first café on?

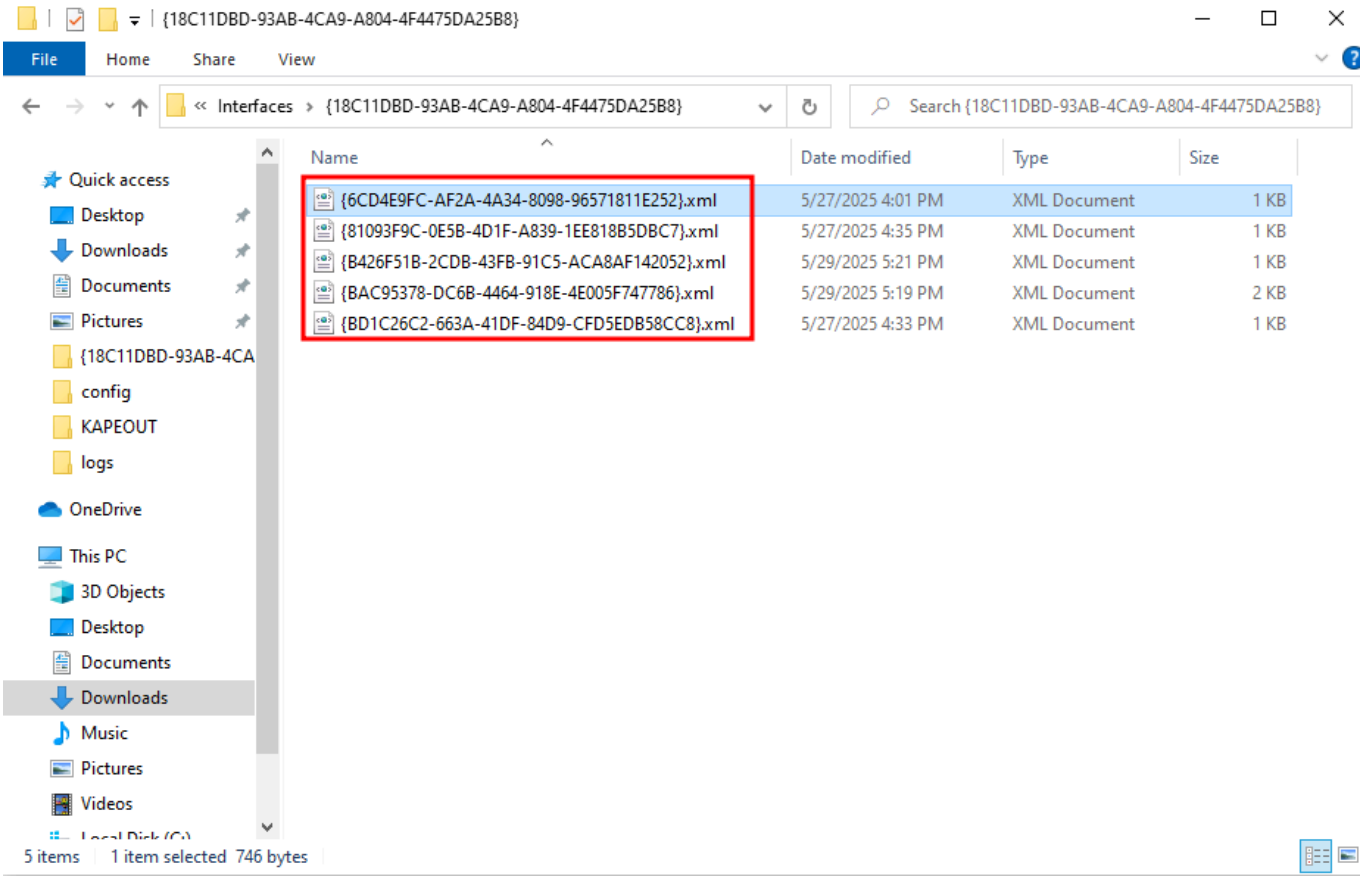

I can browse ArboretumCoffee in the goole map

Answer: W Prospect Rd

23. Investigators may want to follow up on the Wi-Fi credentials used at the first café the suspect visited. Which file stores the authentication details (including the encrypted password) for the first network?

It can be found on C\ProgramData\Microsoft\Wlansvc\Profiles\Interfaces\{GUID}

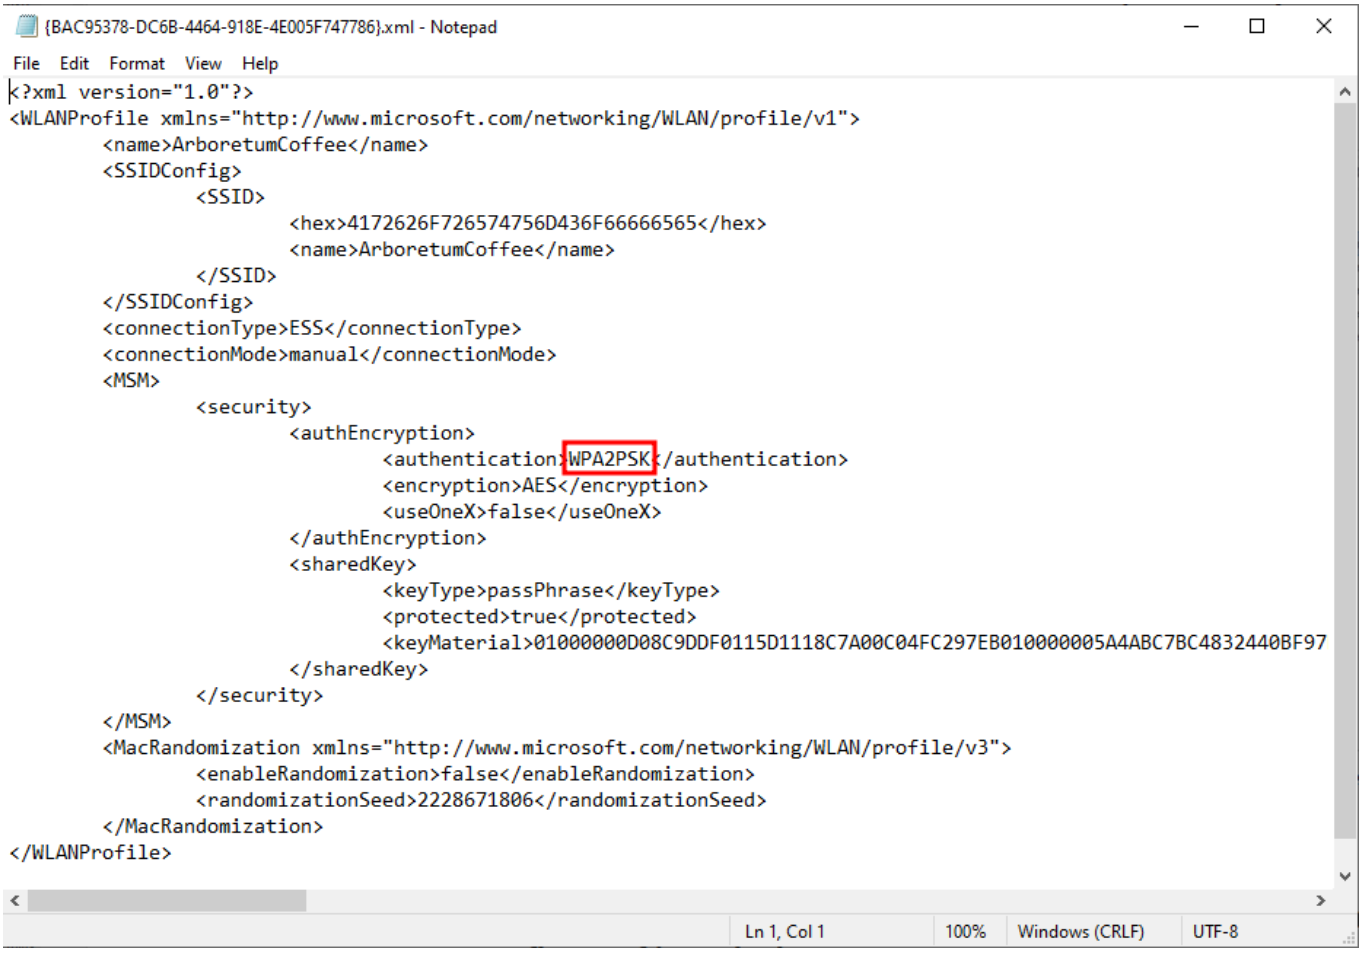

Those show the interface information for each network it connected. The fourth one shows the first cafe's wifi

Answer: {BAC95378-DC6B-4464-918E-4E005F747786}.xml

24. What authentication method was used to connect to the first café's Wi-Fi?

Open the file content

Answer: WPA2PSK
